# Google Cloud Security & Compliance Program

DEVELOP A STRONG SECURITY PROGRAM. This engagement prepares your Google Cloud security program for security, scalability, and manageability. ScaleSec will walk through each major outcome to ensure a robust security program for your business.

## Cloud Security Program Development

Whether you are launching a new security program or modernizing an existing security program– ScaleSec can help in managing ongoing security and compliance in the cloud for popular frameworks.

This 10-week engagement includes several phases to develop your cloud security program:

- ✓ Development of a risk matrix
- ✓ Creation of policy templates
- ✓ Document control responses
- ✓ Create and organize supporting audit artifacts

## Outcomes from the program include:

- Documented existing practices
- Documented processes, standards, controls aligned to desired framework
- GCP security guidance for developers
- A roadmap to achieve the next level of security maturity
- Prescriptive guidance and metrics

## Intended Audience

Security managers are encouraged to participate in discussing important decisions. Compliance specialists and product developers are also encouraged to join.

## GCP Cloud Experts

### Engagement Scope

- 🔒 This engagement covers a broad range of outcomes including:
- 🔒 Populating a risk matrix to prioritize security efforts
- 🔒 Recommendations for framework category inclusion and exclusion
- 🔒 Strategy to launch and maintain your security or compliance program
- 🔒 Creation of system and software lifecycle methods
- 🔒 Compliance cloud security recommendations
- 🔒 Expert advice on how to prepare your artifacts to pass an audit

Compliance frameworks supported
